## NAVACLEAN 818 COLDWASH

G.P. TANK CLEANER & DEGREASER

### APPLICATION, FEATURES & BENEFITS

- Approved according to IMO MEPC.1/Circ. 590, October 2007
- Wide application range-from local heavy degreasing to tank cleaning.
- Wide cleaning spectrum-effective on mineral oil residues, a wide range of natural oils and petroleum based chemicals.
- Suitable for use on almost all tank linings.
- Controlled emulsion breakage-allows cleaned oil to be easily reclaimed.
- Can be applied by any conventional means from hand-spray to recirculation and direct injection.

### DESCRIPTION

NAVACLEAN 818 – COLDWASH contains a blend of solvents and emulsifiers formulated to provide a broad spectrum cleaner with maximum solvent penetration and efficient emulsification.

NAVACLEAN 818 - COLDWASH may be hand-sprayed undiluted for spot cleaning of petroleum oil residues, petroleum based chemicals and some natural oils.

When used in water solution to clean tanks after petroleum and chemical cargoes, the emulsion formed will break in a matter of hours, allowing oil released in the slop tank to be reclaimed.

Dispersant solvents and wetting agents in NAVACLEAN 818 - COLDWASH penetrate and break-up residues, freeing them from tank surfaces.

Emulsifying agents then enable the residues to be easily removed by fresh or salt water.

### DIRECTIONS FOR USE/APPLICATIONS & DOSAGE RATES

Undiluted NAVACLEAN 818 - COLDWASH is recommended for local cleaning and degreasing and may be applied by brush, hand-spray, immersion soaking or any other conventional means. Depending on the type and the amount of residue to be removed it may be necessary to allow time -up to 4 hours- for the cleaner to act before rinsing with either fresh or salt water.

NAVACLEAN 818 - COLDWASH may also be used by injection or recirculation at strengths up to 5%  
For specific cleaning instructions please contact NAVADAN.

## NAVACLEAN 818 COLDWASH

G.P. TANK CLEANER & DEGREASER

### PRODUCT CHARACTERISTICS

- **Appearance:** Clear Amber liquid
- **Specific Gravity:** 0.85
- **Flash Point (PMCC):** > 80°C
- **Corrosive action:**
  - **Metals:** None
  - **Rubber:** Slight swelling

### NATURE OF SPECIAL RISKS AND SAFETY REGULATIONS
